SESSION 1. Managing Climate Uncertainties and Water Scarcity

Dr. Maria Victoria O. Espaldon – Panelist

Dr. Maria Victoria O. Espaldon is a human geographer and Professor at the School of Environmental Science and Management (SESAM), UPLB. She was Vice Chancellor for Research and Extension of UPLB from 2011 to 2014, and Dean of SESAM from 2006 to 2011. Her major research works are in the area of climate change adaptation, human dimensions of environmental changes, environmental and social impact assessment, program monitoring and evaluation, and ecosystem assessment.

Dr. Espaldon has published numerous articles on various subjects related to her expertise. She is the current program leader of the project Smarter Approaches to Reinvigorate Agriculture as an Industry in the Philippines (Project SARAI), a nationwide agriculture program funded by Philippine Council for Agriculture, Aquatic and Natural Resources Research and Development (PCAARRD) of the Department of Science and Technology.
