Mr. John Garrity is Senior Connectivity Advisor for Digital Inclusion within the Center for Digital Development in the U.S. Global Development Lab, United States Agency for International Development (USAID). Mr. Garrity leads USAID’s operations on extending Internet access and adoption through policy engagement and program management. This includes identifying and shaping policy and regulatory reform with respect to broadband Internet expansion, engaging with various public and private stakeholders, leading in the technical aspects of developing and maintaining public-private partnerships around digital infrastructure investments and expansion, and assessing feasible technologies for last and middle mile infrastructure deployments, including identifying new, low-cost technologies that might replace current infrastructure.

Before USAID, Mr. Garrity spent 10 years at Cisco, most recently as Senior Manager of Policy Research managing technology policy engagements and defining appropriate policies to expand broadband infrastructure deployment. His first role at Cisco was as Manager of Emerging Market Strategy, responsible for advising Cisco’s emerging markets expansion strategy across 130 countries utilizing macroeconomic analysis and engaging in the public dialogue on the role of information and communications technologies. Prior to Cisco, Mr. Garrity was in the Corporate Strategy Group at the World Bank, and held previous roles at the Federal Trade Commission and in state government. He holds an undergraduate and graduate degree in Agricultural and Development Economics from The Ohio State University.
The best resource to convey the work that Mr. John Garrity and his team are doing in the Center for Digital Development on digital agriculture is this USAID programming toolkit that their Center published, which covers a range of USAID's activities on topic:
